ABOUT US

In the 1960s, we set out to carry out construction and contracting activities. Our understanding of the right business, reliable and ethical business life has given us more than half a century of experience. Today, we are steadily growing the Helka Trademark with our corporate structure and qualified human resources, including third-generation family members.

As the Helka Trademark, we implement various thematic projects and produce commercial and living spaces for the needs that are renewed with the changing world. We have determined as our corporate vision to establish environmentally friendly and aesthetic living spaces that will add comfort to human life. While continuing our projects, we prioritize our humanitarian and moral values. One of Helka's main goals is to ensure that every project produced is a cause of happiness and pride for each of our collaborators. With this basic purpose, Helka became the architect of many innovative applications in the sector and the name behind the projects that add value to the city.

BABEL TERRACE

Helka Construction

The living area consist of 80 residences, an underground parking lot for 80 vehicles, an outdoor swimming pool, mini sports. With its field, observation terrace, orchard, and playground that will excite even the grown-ups, you can enjoy the green, panoramic view. It turns into a pleasant area by combining the pleasure of canyon and mountain views with privileged standards.

BARGAH RESIDENCE

BARGAH RESIDENCE

Helka Construction

Bargah Residence offers a life intertwined with its historical silhouette and today's modern architectural language in the Arslanlar region, which is right next to the Bağlar historical texture of Safranbolu. Bargah Residence, with its loft architecture and a world, focused on minimalism, gives a new excitement to the city with its architecture and location.

MOBILE HELKA

In addition to its concrete batching plants, concrete mixers, concrete pumps, and other modern equipment, Helka also provides on-site mobile concrete service for its customers who want shorter and faster solutions.

Expert In Used Commercial Vehicles And Used Heavy Construction Equipments...

Our company, which has an ever-growing market share in the second-hand commercial vehicle, heavy vehicle and construction equipment sector, continues its commercial activities at home and abroad.

Helka also provides equipment for rental services for customers who want easier and faster solutions with its construction equipments and heavy vehicles.

Quality Production, Principled Trade, Principled Service...

Within the framework of developing market share and demands, it provides services in a wide area with aggregate production facilities such as sand quarries and quarries in different locations of Turkey.

With our infrastructure and sectoral experience, we can realize large and small projects such as Dams, HEPs, Ponds, Airports, Concrete Roads and Mass Housing in different regions of our country, and add value to the projects we take part in.
